Our new Eco Warrior Team

Reported by Morgan McVeigh.

We are pleased to have a new 2016/17 Eco Team. The Leader is Jack Lewis who is looking forward to his new role. The secretary is Emily Seddon, who says “I love my new role”. The warrior team is: Daniel Brooke, Paige Kiff, Eliza Karpowicz, Morgan McVeigh, Ben Taylor, Isabella Smith, Alice Murphy, Jake Wade and Peter Rush.

Super Saving Super Stars

Our Eco Team would like to thank all children and staff for their support in saving waste, water and electricity.

This week in particular we have been saving on electricity and encouraging everyone to ‘Save energy and switch off’.

Planting for our future

The Eco-Team proudly helped Nursery and Reception class to each plant their own tree sapling. The trees were funded as part of a project by The Woodlands Trust. We measured the small saplings which were 75cm, almost as tall as the Nursery and Reception children! We are looking forward to watching our trees grow each year, as the children progress through our school until Year 6. Watch this space for future updates!

Life is better with trees - Facts!

- Our neighbourhoods feel better places to live and work in when they're green.
- Our farmland and countryside can produce high-quality food and support wildlife when trees play a part in the landscape.
- Planting a variety of trees and shrubs can help to improve the resilience of our land. This supports our woods and trees, helping them bounce back from current threats such as climate change, tree pests and disease.
- We all breathe easier when there are beautiful woods in which to relax and unwind.

Interview with Morgan McVeigh

On behalf of our Eco Team I would like to say that this year we will do our best to be eco-friendly and to encourage ALL the other children to get involved and help us too! We will continue to monitor our environment and ensure we are ALL reducing, reusing and recycling. We will guarantee to do the best we can!
